ENGIN LAUNCHES BREAKTHROUGH VOIP ALL-IN-ONE DEVICE TO DELIVER BROAD CONNECTIVITY FEATURE SET

*engin's Voice Box Series 3 all-in-one combines wireless router and ADSL
modem functionality with VoIP service*

Sydney, 9 May 2006: engin today set a new benchmark in VoIP services, which improve cost savings while reducing phone and computer complexity for Australians, with the launch of the all-in-one *engin Voice Box Series 3*.

The *engin Voice Box Series 3* converts normal analogue phone signals to digital and sends them over a broadband connection allowing ADSL broadband users to connect their existing telephone line to make and receive calls from their current telephone number and at the same time benefit from engin's low cost local, national, international and mobile call rates.

engin's Voice Box Series 3 incorporates plug and play simplicity, allowing home and business users to make calls to and receive calls from any landline, international destination and mobile phone over their existing broadband Internet connection. *engin Voice Box Series 3* is one the most advanced VoIP units on the market and includes a range of exciting new features:

- **ADSL/ADSL2+ modem** so end users can connect to their Internet Service Provider (ISP)
- **Connect up to two engin services** plus the option of connecting your existing phone line so that you can still receive phone calls from your existing phone number
- **Wireless Router** allows end users to connect additional devices to the Internet using a wireless and wired connection

- **Automatic detection and configuration** of both the engin service and modem and router
- **Four Ethernet ports** and comprehensive security features such as a **double firewall, Denial of Service (DoS) attack prevention and intrusion detection and prevention (IDS)**

engin Voice Box Series 3 also includes voicemail, call waiting, call forwarding, caller ID, call line ID and turbo dialing.

“The day-to-day demands of telephony and desktop computing have just become a lot easier and cheaper with the all-in-one engin Voice Box Series 3,” said Ilkka Tales, Chief Executive Officer, engin. *“engin is committed to helping Aussies drive down the cost of their home or office phone bills, while removing the complexity of today’s digital devices. We are very excited with the features of the new engin Voice Box Series 3, which puts even more simplicity, control and massive savings in the hands of our customers.”*

Built by NETGEAR, the *engin Voice Box Series 3* includes a money back guarantee, 30 day trial and two year NETGEAR warranty. *engin Voice Box Series 3* will be available for \$319 RRP in Australia from late June 2006 on the shelves of Australian retailers , through engin’s resellers or direct at www.engin.com.au and 1300 305 000.
